

What Makes A Good ITGS Log Book?

What IB says about the log book:

“The log book contains regular, dated entries from analyzing, planning, testing, implementing and evaluating the process and product. These include references for information, sketches and designs, evaluative comments and other appropriate entries recorded throughout the entire process from criterion G through K.”

What Every Entry Should Have:

- ✓ Date:
- ✓ Stage in the Process:
 - G - **Identifying** the problem
 - H - **Analysis** and feasibility study
 - I - **Planning** and developing
 - J - **Testing** and evaluating
 - K - **Assessing** the social significance
- ✓ Detailed and reflective description of where you are in the process

Characteristics of a Good Log Book

- ✓ Reflects the **process** of your project
- ✓ Has regular entries (daily/bi-daily)
- ✓ Insightful entries (no fluff)
- ✓ **Creative** - drawings, sketches, diagrams, charts, etc.
- ✓ Clean, clear, legible
- ✓ Organized well - easy to follow the process of the project
